C4I News & Events

The MSU Center for Interdisciplinarity (C4I) is committed to creating an environment that supports the development of innovative, collaborative, and inclusive interdisciplinary research and education. Our office has been thrilled to see the growth of interdisciplinary collaborations across engineering, social sciences, and the humanities. This fall, we're excited to announce a new initiative that will aim to foster these collaborations and encourage the sharing of ideas and resources. The goal is to support and promote interdisciplinary research that addresses real-world challenges and contributes to the advancement of knowledge.

Survey Request from The Institute for Cyber-Enabled Research

We traditionally been heavy users of research computing. We are particularly interested in services as well as community members who are considering using more. We would appreciate feedback from both current users of research computing and the larger community of potential users.

The Institute for Cyber-Enabled Research is seeking feedback on the current needs and expectations of the MSU community with regards to research computing resources. The survey will inform strategic decisions regarding investments in this area. This survey can be found at this link. Survey closes on September 20, 2021.
